WHY YOU ARE NERVOUS

The nervous system is the alarm system of the human body.

In perfect health we hardly realize that we have a network of nerves, but when health is ebbing, when strength is declining, the same nervous system gives the alarm in headaches, tiredness, dreamful sleep, irritability and unless corrected, leads straight to a breakdown.

To correct nervousness, Scott's Emulsion is exactly what you should take; its rich nutrient gets into the blood and rich blood feeds the tiny nerve-cells while the whole system responds to its refreshing tonic force. It is free from alcohol.

An experiment over the line in Colorado with Burbank's spineless cactus has resulted with great success, according to the experimenter. A 45 per cent sugar content makes it a great favorite with stock, and the new plant is superior in fattening quality to any of the other forage plants.
